Subject: Dico ERW #6 and #7 Update

Erin, the well contractor and hydroblast contractor were at Dico yesterday to do the hydroblast cleaning of the well screens on extraction wells #6 and #7 at Dico. The hydroblast cleaning was completed and the two extraction wells were reassembled and placed back into the well casings.

The extraction wells were restarted and back in operation at approximately 4 PM yesterday.

If the flow rates of these two extraction wells does not significantly increase within the next week, the well contractor will be contacted to determine what else can be done to increase the flow rates of these two extraction wells.

Brian Mills
